

MIRIAM T. MITCHELL

December 10, 2018

280851

The Honorable John E. Howard  
Public Service Commission  
101 Executive Center Drive, #100  
Columbia SC 29210

**CERTIFIED MAIL  
RETURN RECEIPT REQUESTED**

Dear Commissioner Howard:

This letter follows my letter dated September 12, 2018 with enclosed petition signatures which I hand delivered to SCANA Chairman Maybank Hagood at the Shareholders meeting in Columbia on the same date. I also sent a copy of this letter with petition signatures to you and the Chairman of Dominion Energy. As promised, enclosed is the "Petition Regarding Merger and Severance Compensation for SCANA Executives" with more signatures for your consideration.

To remind you, following are some of the reasons why the signees disagree with the executives receiving the bonuses, merger and severance compensations:

- |   |
|---|
| • 5,000 employees lost their jobs   |
| • Over the past ten years, there have been nine rate increases and SCANA customers have paid an additional 18% of their monthly electric bills to support and pay for the now failed nuclear reactors                                     |
| • SCANA was portrayed as "going bankrupt" if customer rates were reduced, while in the same timeframe executive merger and severance compensation "rewards" were revealed to shareholders. They had already received significant bonuses. |
| • Although shareholders voted against the \$38 million merger compensation, SCANA Chairman Hagood announced that this vote was "nonbinding"   |
| • Although Chairman Hagood announced the non-revocable trust severance compensation, it was not explained at the meeting nor did I see it on the proxy statement. (Perhaps I overlooked it?)  |
| • Stockholders saw their dividends decreased by 80% and value of stock shares reduced by approximately 50%  |
| • There are now 2 failed nuclear reactors that will never be functional and as a result, there is a \$9 billion sinkhole which will take decades for customers to pay   |

There's been discussion about the Bechtel Engineering Audit Report SCANA received in October 2015 that exposed inadequacies of the construction, yet shareholders were not made aware of its existence until Governor Henry McMaster forced the disclosure and newspapers reported it in 2017. Governor McMaster also played a major role in getting the electric rates reduced. The executives have enjoyed lucrative salaries and perks in addition to bonuses. Payment of the bonuses when the nuclear reactors were under construction and proposed merger and severance compensations, "binding" and "non-revocable," are grossly unreasonable, an insult to customers and shareholders, and proof of yet more poor judgment and uncontrollable greed.

I would appreciate your considering the enclosed additional petition signatures seriously since this represents the public reaction to the circumstances surrounding the two failed nuclear reactors.

Please feel free to contact me at either my phone number or email address to discuss this very serious matter.

Sincerely,

Miriam T. Mitchell

## PETITION REGARDING MERGER AND SEVERANCE COMPENSATION FOR SCANA EXECUTIVES

We are troubled about the proposed spending of \$38 million merger and \$110M severance compensation to reward SCANA executives for mismanagement and lack of leadership behaviors leading to the failure of the construction of the 2 nuclear reactors at Jenkinsville SC.

We demand that any merger and severance compensation actions be stopped immediately and that the executives also be required to pay back bonuses received during the now-failed construction.

The executives are looking out for their financial gain and not for the best interests of hundreds of thousands, if not millions, of SCE&G customers and SCANA shareholders, which they have already exploited.

**We demand that Maybank Hagood, Chairman of the Board, and the Board of Directors of SCANA Corporation, respect the decision of the signees and not grant the \$38 million merger and \$110M severance and any other compensation packages to all of the SCANA executives. We also demand that the executives return the bonuses received during the now-failed construction although they were aware of serious issues.**

## PETITION REGARDING SEVERANCE FOR SCANA EXECUTIVES

We are troubled about the proposed spending of \$110M severance package to reward SCANA executives for mismanagement and lack of leadership behaviors leading to the failure of the construction of the 2 nuclear reactors at Jenkinsville SC.

We demand that any severance buyout action be stopped immediately and that the executives also be required to pay back bonuses received during the now-failed construction.

The executives are looking out for their financial gain and not for the best interests of hundreds of thousands, if not millions, of SCE&G customers and SCANA shareholders, which they have already exploited.

**We demand that Maybank Hagood, Chairman of the Board, and the Board of Directors of SCANA Corporation, respect the decision of the signees and not grant the \$110M severance and any other severance packages to all of the SCANA executives. We also demand that the executives return the bonuses received during the now-failed construction although they were aware of serious issues.**

## PETITION REGARDING SEVERANCE FOR SCANA EXECUTIVES

We are troubled about the proposed spending of \$110M severance package to reward SCANA executives for mismanagement and lack of leadership behaviors leading to the failure of the construction of the 2 nuclear reactors at Jenkinsville SC.

We demand that any severance buyout action be stopped immediately and that the executives also be required to pay back bonuses received during the now-failed construction.

The executives are looking out for their financial gain and not for the best interests of hundreds of thousands, if not millions, of SCE&G customers and SCANA shareholders, which they have already exploited.

**We demand that Maybank Hagood, Chairman of the Board, and the Board of Directors of SCANA Corporation, respect the decision of the signees and not grant the \$110M severance and any other severance packages to all of the SCANA executives. We also demand that the executives return the bonuses received during the now-failed construction although they were aware of serious issues.**

MIRIAM T. MITCHELL

September 12, 2018

Mr. Maybank Hagood  
Chairman of the Board  
SCANA Corporation  
220 Operation Way  
Cayce SC 29033-3701

Dear Chairman Hagood:

You will find enclosed the "Petition Regarding Severance for SCANA Executives," which contains signatures of concerned shareholders and customers from the Lowcountry expressing disdain about proposed dollar payouts for the SCANA executives. I will forward more signatures to you at a later date.

I'm at a loss to understand how the SCANA directors believe that the executives are entitled to huge sums of money to reward them for their performance. I have difficulty rationalizing how "rewarding" executives millions for an enormous failed project that customers and shareholders will continue to pay for decades, can reduce the \$9 billion owed—or alleviate the tragedy—or even makes sense. I believe that paying these multimillion dollar sums enables the executives to continue to profit at the expense of those who have supported them faithfully throughout past years because they had trust in them. But the recommendations called for allow the executives a payout of multimillions, enabling them to benefit from additional wealth in addition to enjoying their lucrative salaries that they have enjoyed for years.

Following are some reasons I disagree with the compensation payouts and bonuses:

• SCANA stock value has decreased dramatically since the Bechtel Engineering audit was released
• 5,000 employees have lost their jobs
• SCANA customers have been paying for years an additional 18% of their monthly electric bills to support and pay for the nuclear reactors
• SCANA was portrayed as "going bankrupt" if customer rates were reduced, while in the same timeframe executive "rewards" were presented to shareholders
• SCANA stockholders saw their last quarterly dividends decrease by approximately 80%
• There are now 2 failed nuclear reactors that may never be functional and as a result, there is a \$9 billion sinkhole

These are some of the reasons I disagree about rewarding these compensations and past bonuses and consider any proposed, binding or non-revocable, compensations to be unreasonable and illustrations of yet more poor judgment and uncontrollable greed.

I would appreciate your considering the petition seriously since this represents the public reaction to the circumstances surrounding the two failed nuclear reactors.

Please feel free to contact me at either my phone number or email address to discuss this very serious matter.

Sincerely,

*Miriam T. Mitchell*

## PETITION REGARDING SEVERANCE FOR SCANA EXECUTIVES

We are troubled about the proposed spending of \$110M severance package to reward SCANA executives for mismanagement and lack of leadership behaviors leading to the failure of the construction of the 2 nuclear reactors at Jenkinsville SC.

We demand that any severance buyout action be stopped immediately and that the executives also be required to pay back bonuses received during the now-failed construction.

The executives are looking out for their financial gain and not for the best interests of hundreds of thousands, if not millions, of SCE&G customers and SCANA shareholders, which they have already exploited.

**We demand that Maybank Hagood, Chairman of the Board, and the Board of Directors of SCANA Corporation, respect the decision of the signees and not grant the \$110M severance and any other severance packages to all of the SCANA executives. We also demand that the executives return the bonuses received during the now-failed construction although they were aware of serious issues.**

## PETITION REGARDING SEVERANCE FOR SCANA EXECUTIVES

We are troubled about the proposed spending of \$110M severance package to reward SCANA executives for mismanagement and lack of leadership behaviors leading to the failure of the construction of the 2 nuclear reactors at Jenkinsville SC.

We demand that any severance buyout action be stopped immediately and that the executives also be required to pay back bonuses received during the now-failed construction.

The executives are looking out for their financial gain and not for the best interests of hundreds of thousands, if not millions, of SCE&G customers and SCANA shareholders, which they have already exploited.

**We demand that Maybank Hagood, Chairman of the Board, and the Board of Directors of SCANA Corporation, respect the decision of the signees and not grant the \$110M severance and any other severance packages to all of the SCANA executives. We also demand that the executives return the bonuses received during the now-failed construction although they were aware of serious issues.**
